

AN AFFILIATE OF AMINI INNOVATION, CORP.

## GENERAL SPECIFICATIONS

- All shells, returns and bridges are shipped knocked down (KD) with metal-to-metal fasteners.
- All other products ship fully assembled.
- Top finishes are coated with a scratch resistant two part catalyzed finish.
- Veneer is book matched on tops, end panels, drawer and door fronts.
- All pieces (box/box/file, file/file, 2-door cabinet, desk shell and credenza shell, etc.) have adjustable levelers in each corner.
- All non-exposed surfaces are sanded and have a clear finish applied to the interior walls, bottoms and tops of the cabinets.
- Wire management grommets located on all shell units and hutches.

## MODULAR PEDESTALS

- All file drawer suspensions are heavy duty with full extension (at equal lengths). They are mounted in the center of the drawer side and extend far enough to obtain full access to drawer contents.
- All drawer sides are  $\frac{1}{2}$ " material with extruded aluminum file support insets.
- File drawers accommodate both letter and legal size folders, with adjustable dividers in both directions.
- The drawer bottoms of all pieces are  $\frac{1}{2}$ " thick plywood with a front to back center support and 4 corner blocks underneath. (No exposed nails)
- All drawers have dovetailed drawer joints
- The locks for all pedestals are located in the upper right hand corner in the top rail and will lock all drawers at one time (gang lock).
- All drawer interiors and exteriors are finished, sanded and clear coated.
- Box drawers have removable dividers, which run left to right.
- All pedestals have levelers on all 4 corners that are adjustable with an Allen wrench.
- All locks, lock parts and additional hardware are CompX Timberline.
- All locks are keyed alike.
- Pedestals have open tops made of a lumber frame and are open in the center.

## FREE STANDING CABINETS

### (Lateral Files, Bookcases, Storage Cabinets)

- Cabinet top is  $\frac{1}{2}$ " thick MDF with veneer on both sides of the top.
- All file drawer suspensions are heavy duty with full extension (at equal lengths). They are mounted in the center of the drawer side and extend far enough to obtain full access to the drawer contents.
- All drawer sides are  $\frac{1}{2}$ " material with extruded aluminum file support insets.
- File drawers accommodate both letter and legal size folders with adjustable dividers.
- The drawer bottoms of all cases are  $\frac{1}{2}$ " thick material with a front to back center support and 4 corner blocks underneath drawer bottoms.
- Freestanding 2, 3, or 4 drawer file cabinets have an interlock system installed on the interior sidewall, which prevents more than one drawer being opened at a time.
- Freestanding 2, 3, and 4 drawer file cabinets have a counter-weight balance added to the back wall or bottom panel to prevent tipping.
- All drawer interiors and exteriors are finished, sanded and clear coated.
- All cabinets have levelers on all 4 corners that are adjustable with an Allen wrench.
- All locks, lock parts and additional hardware are purchased from CompX Timberline.
- The locks for all cabinets are located in the upper right hand corner in the top rail and will lock all drawers at one time (gang lock).
- All locks are keyed alike.
- All bookcases and storage cabinets include adjustable shelves
